Air conditioning guide

Inventor Professional (PFUVI) · inverter, cooling and heating

Close all windows and doors, then press ON/OFF.

IMPORTANT: CLOSE ALL WINDOWS AND DOORS

The air conditioners are connected to the windows and doors of the villa. **If even one window or door anywhere in the house is open, none of the air conditioners will work.** Close them all, then switch the unit on.

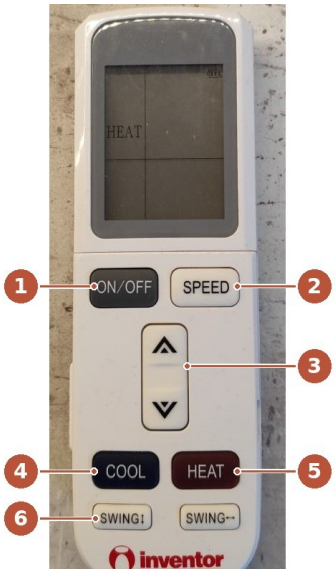

1 The units

Living room	24,000 BTU
Bedrooms, upper floor	12,000 BTU
Bedroom, ground floor	9,000 BTU

All units use the same remote control. Point it at the indoor unit (range up to 8 m).

2 The remote control (cover closed)

Everything you need every day

1. **ON/OFF** switches the unit on or off.
2. **SPEED** fan speed: Low, Mid, High, Auto.
3. **▲ / ▼** set the temperature (16 to 32 °C).
4. **COOL** cooling mode (summer).
5. **HEAT** heating mode (winter).
6. **SWING** the flap moves up and down to spread the air. Press again to stop it.

3 Cool or heat in 5 steps

1. **Close all windows and doors** in the villa.
2. Point the remote at the unit and press **ON/OFF** (1). You hear a beep.
3. Press **COOL** (4) in summer or **HEAT** (5) in winter.
4. Set the temperature with **▲ / ▼** (3). We recommend **24 to 26 °C for cooling** and **21 to 23 °C for heating**.
5. If you wish, change the fan speed with **SPEED** (2) and press **SWING** (6). Press **ON/OFF** to switch off.

4 More buttons (under the cover)

Slide the cover open

7 **MODE** Auto, Cool, Dry, Fan or Heat. **Dry** removes humidity on muggy days.

8 **TURBO** maximum power for a fast cool-down or warm-up.

9 **SILENCE** quieter operation.

10 **SLEEP** gentle night mode, for up to 10 hours.

11 **TIMER** switch off automatically: press **TIMER**, set the hours (0.5 to 24) with ▲ / ▼, press **TIMER** again.

12 **DISPLAY** turns the light on the unit off, nice at night. Press again to turn it on.

13 **ECO** energy-saving cooling (Cool mode only, ends after 8 hours).

5 Tips

- Close the **shutters and curtains** in the afternoon: the room stays cool and the unit works less.
- Do not set the lowest temperature: it does not cool faster, it only uses more power and can make you feel unwell.
- **Switch the air conditioning off when you go out** and when you leave the villa.

6 Safety

SAFETY

- **Do not put fingers or objects into the air outlet** or inlet, and do not block them.
- Do not point cold air directly at your body for a long time, especially at **children and elderly people**.
- Do not spray water or insecticide on the unit, and keep the remote dry. Never touch the unit or switches with wet hands.
- Children under 8 should not use the air conditioning without supervision. Keep the remote batteries away from small children.
- During a **thunderstorm** switch the unit off. If you notice **smoke, a burning smell or unusual noise**, switch it off at once and call us.

7 Quick fixes

Unit does not start	Check that **all windows and doors are closed**, also in the other rooms.
No reaction to the remote	Point it straight at the unit. If the remote display is blank, the 2 AAA batteries need changing: message us.
Not cool or warm enough	Check the mode (**COOL** / **HEAT**), lower or raise the temperature, try **TURBO**.
Water dripping from the unit	Switch it off and message us.
